

IGNOVA

SYSTEMS INTEGRATION

Innovation. Integration. Igniting Change.

Digital transformation journey

Delivering integrated solutions

The Future Starts Now

Operational excellence

Tailored to each project

The Future Starts Now

Who We Are

At IGNOVA, we don't follow innovation — we lead it. We are a forward-thinking technology company specializing in designing and deploying cutting-edge intelligent systems.

Our mission is to empower government entities, institutions, and private-sector organizations to turn complex challenges into scalable smart solutions.

We are committed to supporting national digital transformation strategies and building sustainable, intelligent infrastructure — through solutions aligned with the country's smart city and innovation vision.

Our offerings are built on innovation, engineered for performance, and designed to elevate operational efficiency.

A man with a beard is shown in profile, looking upwards and to the right. He is wearing large, dark VR goggles. Overlaid on his face and body is a green-tinted, semi-transparent image of a city skyline, featuring several tall skyscrapers. The background is a bright, hazy sky with soft clouds.

Our Vision

To be the trusted smart partner for public and private sector leaders on their digital transformation journey — by delivering integrated solutions that redefine automation, control, and operational excellence.

Our Mission

To deliver comprehensive technology solutions that seamlessly combine operational efficiency with intelligent user experience — tailored to each project's unique requirements and executed with precision and excellence.

Our Smart Solutions

We provide fully integrated smart technology systems that make buildings smarter, operations smoother, and energy consumption more efficient.

Our smart solutions deliver measurable outcomes, including:

UP TO 30% reduction in energy consumption

UP TO 35% improvement in infrastructure efficiency

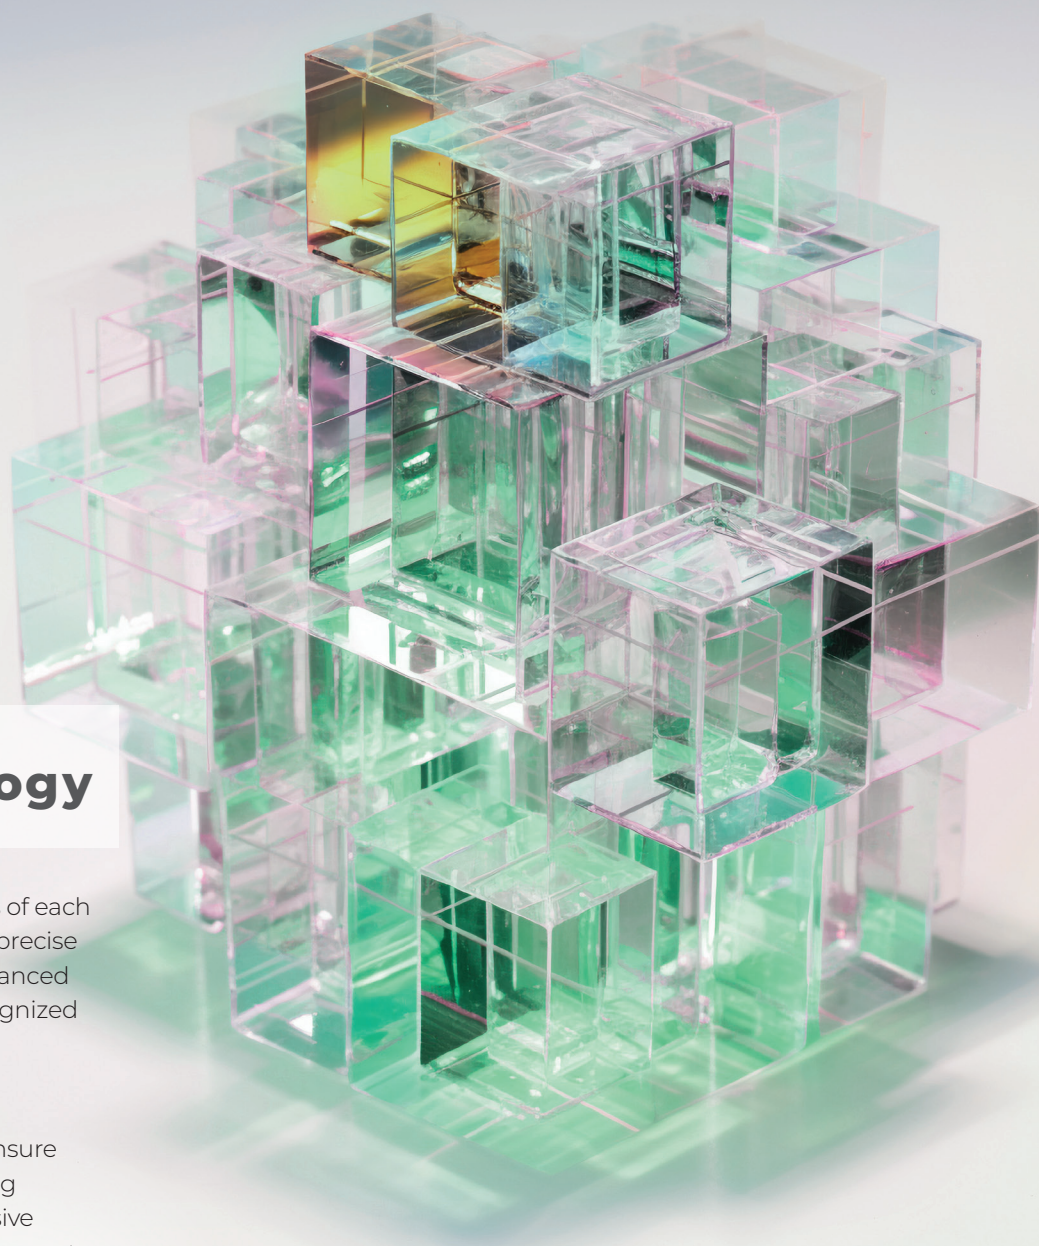

UP TO 40% increase in operational performance

Our services include:

- › Energy management and operational optimization systems.
- › Smart building automation and control platforms.
- › Seamless integration with KNX protocols and IoT technologies.
- › Advanced infrastructure for intelligent lighting systems.
- › Custom-developed software for monitoring, control, and automation.
- › End-to-end project delivery: design, engineering, implementation, and technical support.

Our methodology is a comprehensive approach that combines advanced engineering and design with rigorous integration protocols to ensure seamless compatibility with existing systems. We begin with a thorough analysis of each client's specific needs, followed by precise engineering and design using advanced technologies & internationally recognized standards. We implement our solutions using rigorous integration protocols to ensure seamless compatibility with existing systems — backed by comprehensive training and long-term technical support.

Our Methodology

Industries We Serve

Government agencies and infrastructure
Financial institutions and banking sector
Hospitals and healthcare environments
Universities and research institutions
Real estate developers and general contractors
Hospitality, hotels, and residential communities

Our Brands

Under the IGNOVA umbrella, we operate three specialized brands:

Glühder Advanced lighting systems for smart buildings and high-efficiency environments

AxirA Flexible automation software and intelligent control platforms

Kontrix Centralized management systems built on KNX, designed for large-scale infrastructure

Technical Capabilities & Partnerships

- › Certified integration with the global KNX protocol
- › Full compatibility with Internet of Things (IoT) technologies
- › Compliance with European and American smart building standards
- › Strategic partnerships with globally recognized technology providers
- › Commitment to best practices in cybersecurity, sustainability, and future-readiness

Together, We Shape The Future
